

**IC Care, In-Home Companion Care**, strives to set the standard for private in-home care in the Ohio Valley. We take the time to assess each case individually and collaborate to select a caregiver that will be a good fit for your family.

IC Care places extreme value on the interpersonal value of relationships for our clients. That's why we do not practice the "bodies and addresses" care philosophy. We do not simply send random caregivers to our clients. Rather, our professional staff collaborates to find "the right fit" of a caregiver for you or your loved one. The best care is given by a person that fully understands not only the situation but also the person being cared for. Interpersonal Relations covers things like companionship and recreational activities, but it differs for each client with a thoughtful, personalized plan of care.

Many non-medical in-home care agencies do not have registered medical professionals to oversee their clients' daily care. IC Care does. Our medical expertise is one way that IC Care truly separates itself as the Ohio Valley's number one private in-home care service.

Not only does all of our staff undergo extensive and ongoing training, but our team includes a board-certified RN that is available to our caregivers if any medical questions arise.

Call IC Care today for your **FREE** consultation at **(304)905-8160** or visit us at **[iccare.com](http://iccare.com)**.
